01. Pe'mollis

Packaging & Branding

Pe'mollis is a hand and foot care cream produced for women. Its packaging design was inspired by the color of cream, its logo is minimal and shows the feeling of moisture provided by the cream. It moisturizes the skin from the first day and softens cracks. It gives natural moisture to the heels and skin. Glycerin, with its concentrated special formula enriched with "Allantoin", is instantly softened at the right time for those who want it. While it helps renew the skin, it gives you a soft and silky appearance.

13. Powerbone

Packaging & Branding

Bonegraft continues its R&D studies on synthetic bone tissue and cartilage tissue scaffolds in the biomedical sector as of 2015. In January 2017, Bonegraft R&D laboratory was established at Ege University Technology Development Center under ISO-7 (Class 10000) clean room conditions. Bonegraft is a biotechnology-based company focused on the design, development, manufacturing and marketing of innovative synthetic bone graft products. In addition to its high-tech production and quality control devices, it continues its R&D investments with its expert employees and strong capital structure. It carries out the mass production stages in-house and sterilizes the end-user product, and offers all national and international quality, management and product certificates to its customers in line with the requirements of the sector. They continue to work with confident and determined steps to become a globally respected and sought-after company in the healthcare industry. All stages of design, production and product are under constant supervision by certification bodies, the Ministry of Health and our customers. Bonegraft has adopted the principle of working with the discipline provided by these controls. <https://bonegraft.com.tr>
